

Siv Jönsson, PhD

Researcher, Department of Pharmaceutical Bioscience, Uppsala University, Sweden

Statement: My goal is to strengthen global pharmacometric collaboration, and if elected to the ISoP Board, I would work to promote usage of model-based approaches in clinical practice and public sharing of models and knowledge, and enhance further understanding of how pharmacometric information is used in regulatory assessments; areas I feel strongly about.

Dr Siv Jönsson is an active member of the global pharmacometrics community. Siv's professional background is multi-faceted, in that she has spent time in industry, regulatory agencies and academia; in addition, she has a strong track record in serving the pharmacometrics community as a volunteer and leader in a number of roles, most notably her current position as chair of the annual PAGE conference's scientific organizing committee. As a senior faculty member at the pharmacometrics group at Uppsala University, she would bring a European perspective to the ISoP Board, together with her professional and leadership experience, energy and enthusiasm.

Siv is a senior researcher in the Pharmacometrics group within the Department of Pharmaceutical Sciences, Uppsala University, Sweden, headed by Professor Mats Karlsson. She earned her MSc degree in 1988 and her PhD in 2004, and has thereafter been working in the pharmacokinetic, pharmacodynamic and pharmacometric areas in industry (5 years), regulatory (9 years as pharmacokinetic/pharmacometric assessor within the Swedish authority: Medical Products Agency) and academic contexts. Academically, Siv has spent 2 years as a senior lecturer, and 6 years as researcher, working with methodological and applied pharmacometric projects in areas such as renal transplantation, tuberculosis and haemophilia A/B. Also, Siv was active in the DDMoRe consortium (www.ddmore.eu) working particularly with the open, publicly-available Model Repository. Siv has published approximately 25 peer-reviewed research articles and book chapters and currently co-supervises 2 PhD students. She has been a board member for Uppsala University's Department of Pharmaceutical Sciences since 2013.

From 2012 to 2016, Siv served as a board member of the Section for Pharmacokinetics and Drug Metabolism within the Swedish Academy of Pharmaceutical Sciences (www.apotekarsocieteten.se/english/), whose purpose is to promote integrated drug development by arranging scientific lectures/symposia and educational activities within the areas of pharmacokinetics, pharmacodynamics and pharmacometrics. Siv was part of the organizing committee for the 13th Symposium on Pharmacokinetics and Drug Metabolism (2015). Siv was also co-ordinating the review and selection of the annual Rosenön Award, an award presented by the Swedish Pharmaceutical Society to the best Swedish doctoral thesis of the year defended at a Swedish university (www.apotekarsocieteten.se/stipendier-och-priser/vara-priser/the-rosonon-award/). Siv herself received the Rosenön Award in 2005.

Siv has served as the chair for the Scientific Organising Committee for the Population Approach Group in Europe (PAGE) conference since 2015, taking primary responsibility for arranging its scientific program.
